*Office Memorandum* • UNITED STATES GOVERNMENTTO : Ch/G/RR *gbr*

DATE: 9 December 1957

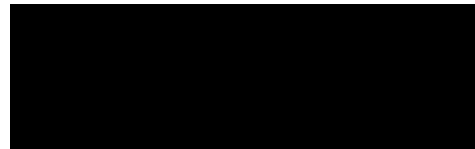

FROM : Ch/D/GC

SUBJECT: K-5237 - Cartographic contribution, estimate of

1. The first study is currently in process in D/GC. Approximately one dozen maps are involved and will, it is estimated, consume approximately 175-200 man-hours. The "raw" material was submitted in a most acceptable form and should prove to be readily converted into fair drawings.

2. It is planned to hold negatives on these projects for a period of 6 months to one year after which they will be destroyed. One copy of each printed map will be submitted to D/GG on an automatic basis.

3. It is expected that this project (K-5237) will commit approximately one full-time person on an average. It is believed that this is in keeping with other Divisional commitments.
